

Healthmonix
72 Swedesford Road STE 110
Malvern, PA 19355

Position: Data Integration Engineer **August, 2020**

Join a growing company where your efforts will be pivotal to our success and you'll help transform healthcare quality.

Healthmonix enhances the quality of healthcare delivery to improve patient health and outcomes. Our cutting-edge platform provides industry-leading SaaS-based healthcare quality measurement and improvement solutions.

At Healthmonix we care about how we work together as much as we care about building and delivering state-of-the-art software for our customers. Your work and quality of life matter to us, as the result of your work will impact thousands of medical professionals, hospitals, private practices, and medical education associations who rely on our platform across the country.

We are looking for a data integration engineer to design and develop APIs using REST & C#, building out systems that integrate with EHRs, EMRs, and other medical systems.

Responsibilities:

- Work closely with a small team of engineers to build web services and projects
- Be self-supportive in creating custom architecture and APIs to effectively deliver robust solutions for the business
- Work seamlessly in an agile environment with engineers, product managers, business analysts, and designers to understand end-user requirements
- Support-what-you-build, including monitoring, performance tuning, and responding to incidents
- Develop, configure, and populate test data, including PHI (Protected Health Information), into a secure environment

Requirements:

- Must have experience in developing RESTful APIs and microservices
- 3+ years of experience with full stack development
- SQL for database schema design
- Advanced database design and administration
- Proficiency in Mirth
- Experience with CCDA, QRDA, and other HL7 healthcare document formats
- Able to research, develop, and configure FHIR interfaces in a healthcare environment
- Continuous integration server(s) (Jenkins / TeamCity / GoCD etc.) and continuous deployments
- Unit test frameworks

Healthmonix

72 Swedesford Road STE 110
Malvern, PA 19355

- Experience working in an agile environment and collaborating with the team to solve technical challenges using rapid and iterative development
- Superior communication skills with the ability to work directly with and troubleshoot issues with clients
