

Value-Based Care Product Owner Job Description

Job Overview

How would you like to join a growing company where your efforts will be pivotal to our success and where you'll be part of transforming healthcare quality?

Healthmonix enhances the quality and value of healthcare delivery to improve patient health and outcomes. Our cutting-edge platforms provide industry-leading SaaS-based value-based care solutions to measure and improve healthcare. We are delivering transformative products and services that impact the healthcare industry. The work we do makes a difference.

Our team is everything to us. At Healthmonix we care about how we work together as much as we care about building and delivering state-of-the art software for our customers. Your work and happiness matter to us, as the results of your work will matter to the thousands of medical professionals, hospitals, private practices, and medical education associations who rely on our platform across the country.

Job Description

We are seeking a Product Owner to join an agile scrum team. This team member is responsible for envisioning a roadmap of our products and assisting with establishing a path forward for test automation.

The incumbent will work closely with stakeholders and the development team to define and oversee the development of products from start to finish, to ensure they meet the clients' needs and preferences. They will work with stakeholders to develop overall vision of healthcare value-based care products, managing backlog items and deciding which features each product will have according to clients' preferences.

Duties and Responsibilities

- Collaborate with prospective users and other stakeholders to understand and anticipate business needs and translate them into product requirements
- Define the vision for the team's product
- Create a product road map based on this vision
- Manage the product backlog and prioritize based on changing requirements
- Oversee all stages of product creation including design and development
- Develop user stories

- Monitor and evaluate product progress at each stage of the process
- Coordinate with the product team and end-users to deliver updates
- Suggest new process improvements as appropriate

Requirements and Qualifications

- Ability to define and communicate product vision
- In-depth knowledge of MIPS, ACOs, EHR and/or HIE systems
- Design-minded
- Excellent knowledge of user-centered design principles
- Excellent oral and written communication
- Ability to prioritize effectively
- Ability to work with technical teams
- Experience in Health IT is a must

Desired Skills

- Experience with HIPAA and PHI
- Experience with SDLC tools, such as JIRA, Confluence, and Zephyr.
- Experience with Analytics platforms, such as Tableau or PowerBI
- Working knowledge of product development architecture
- In-depth knowledge of Scrum and Agile Software Development Methodology

Bachelor's degree and/or 5+ years of equivalent industry experience working as a Product Owner

Scrum or ScrumAlliance certification are a plus.

You will operate in a small team environment with major responsibility, great visibility, and a potential bonus based on performance. You'll work alongside some of the top thought-leaders in healthcare services in a competitively paid environment with great benefits.

If you would like to express interest in our Product Owner role, please email your resume to hire@healthmonix.com.
