

Data Integration Guru Job Description

Company Overview

How would you like to join a growing company where your efforts will be pivotal to our success and where you will be part of transforming healthcare quality? Healthmonix enhances the quality and value of healthcare delivery for over 20,000 healthcare providers to support them in improving patient health and outcomes. Our leading-edge platforms provide industry-leading SaaS-based value-based care solutions to measure and improve healthcare. We are delivering transformative products and services that impact the healthcare industry. The work we do makes a difference.

Our team is everything to us. At Healthmonix we care about how we work together as much as we care about building and delivering state-of-the art software for our customers. Your work and happiness matter to us, as the results of your work will matter to the thousands of medical professionals, hospitals, private practices, and medical education associations who rely on our platform across the country.

Job Description

As the dynamic space of healthcare analytics continues to evolve, we are seeking a Data Integration Guru ready and excited to be involved in delivering products to our customers that help them provide the highest quality of patient care.

This role reports to the VP, Customer Success and includes the coordination with clients to integrate their data with our systems. Work closely with clients, account managers, and data integration team to successfully integrate data from clients into our systems to add optimal value to our clients and further healthcare analytics and our clients' ability to act upon the data. The ideal candidate is a systems thinker, loves data and problem solving, and wants to make a difference.

The Data Integration Guru will operate in a small team environment with major responsibility, great visibility, and a potential bonus based on performance. You will work alongside some of the top thought leaders in healthcare services, in a competitively paid environment with great benefits including healthcare and other insurances, PTO, 401(k), and profit sharing.

Duties and Responsibilities

- Utilize your experience with healthcare data for data integration implementation and data quality analysis
- Create value for our clients by integrating and ensuring high quality, high trust data

- Collaborate with clients, account managers, and engineers to define data points, integration strategies, and timelines
- Work with clients from initial onboarding through implementation and future changes to ensure success
- Configure and monitor data integrations
- Identify data issues, ensuring data integrity issues are escalated to the proper responsible parties, addressing data issues at the source
- Become an expert on our software and drive best practices for data integration strategies
- Locate, define, and communicate recommended process improvements and issues to key internal and external resources regarding data quality
- Analyze, recommend, and influence overall strategy and roadmaps for data integrations
- Communicate and collaborate across teams in a compact, Agile environment

Requirements Skills & Qualifications

- Detail-oriented and proficient in data analysis, with a keen interest in data manipulation and ability to see beyond the data and draw conclusions
- Experience with healthcare data
- Knowledge of healthcare data constructs (e.g. FHIR, HL7, 837s, etc.)
- Ability to manage priorities, demands, and timelines through analytical and problem-solving capabilities
- Superior communication skills with the ability to work directly with and troubleshoot issues with clients
- Expertise in analytics and data analysis, reporting tools, relational databases, and database architecture (SQL a strong plus)

Desired Skills

- Experience in Health IT (Information Technology).
- Experience with HIPAA and PHI.
- Experience as a Project Manager.
- Experience in MIPS, ACO, EHR, and/or HIE systems a plus.
- Experience with Analytics platforms, such as Tableau or PowerBI a plus

Bachelor's degree and/or 2+ years of equivalent industry experience working with healthcare data
